CAREER OBJECTIVE

“As a **Computer Science & Engineering student**, I'm focused on **MERN-stack development**. I've gained hands-on experience in project involving **real-time web applications**. Now that I've officially started my MERN-stack development journey, I'm eager to apply my technical skills to build innovative and impactful solutions.”

EDUCATION

B.E. CSE, CGPA:6.55 till 3rd sem, Kongu Engineering College	2023 – 2027
HSC: 70.6%, Amar National Hr. Sec. School	2022 – 2023
SSC: 90%, Amar National Hr. Sec. School	2020 - 2021

SKILLS

Technical Skills

- Languages: Basic in Java, C, Python, HTML/CSS.
- Frameworks: ReactJS, NodeJS
Storage: MySQL/PostgreSQL, MongoDB.
- Tools & Others: VS Code

Soft Skills

- Time Management
- Communication
- Adaptability

AREA OF INTEREST

- Cloud Computing
- Frontend Development
- Database Management System

LANGUAGES

- English
- Hindi
- Punjabi
- Dogri

PROJECTS

1. **LinkedIn Clone** (Full-Stack Web Application)

- Developed a LinkedIn-like social networking web app using HTML, CSS, JavaScript (Frontend) and MERN Stack (MongoDB, Express.js, React, Node.js) for backend.
- Implemented features such as user authentication, profile creation, post sharing, and feed display.
- Used MongoDB for storing user data, posts, and connections.
- Built REST APIs with Node.js and Express for data handling and integrated them with the frontend.

2. **HR Management & Attendance System**

- Designed and developed an HR management web application to track employee attendance.
- Created the frontend using HTML and CSS for a simple and responsive interface.
- Implemented backend logic in Python to manage employee records and attendance data.
- Enabled features like adding employees, marking attendance, and viewing attendance reports.
- Stored and processed data for efficient employee management.

3. **WhatsApp Clone** (Real-Time Chat Application)

- Developed a real-time chat app using HTML, CSS, JavaScript and MERN stack.
- Implemented user authentication and one-to-one messaging.
- Used MongoDB for storing users and messages and Socket.io for real-time chat.
